

(7) Topic: Configuring Database in Archive log mode / 1 to Archive log mode.

(1) In Oracle 11g.

> # Export backup\_sid = orcl

# backup / at system

# startup

# archive log dest;

# set immediate; (disabled)

# !ex

# backup / at system.

SQL> startup mount;

SQL> alter system set log\_archive\_dest\_1 =  
location = '/usr/aml/oracle/orcl/archive'  
scope = spfile;

SQL> alter system set log\_archive\_format =  
'orcl\_%p\_%q\_%r\_%s\_%t.arc'  
scope = spfile;  
name of database

SQL> alter database archive log;

SQL> alter database open;

SQL> archive log list;  
(enabled)

SQL) Select \* from v\$archived\_log;

SQL) desc v\$archived\_log;

SQL) select name, ~~db~~ sequence# from v\$archived\_log;

18

SQL) alter system switch log file;

SQL) /

SQL) /

SQL) /

SQL) /

SQL) select name, sequence# from v\$archived\_log;

② TO Disable archive log mode:-

SQL) shut immediate;

SQL) startup mount;

SQL) alter database no archive log;

SQL) alter database open;

SQL) archive log list;  
( Disabled )
