Topic:- Difference b/w gzip and tar Command in Linux:-

Gzip:- It compresses a file to minimize its size by low volume. It does not archives as tar does.

tar:- Tar is used to send email as attachment. It archives, (files/directories)

gzip command:-

touch aa.txt

touch bb.txt

touch cc.txt

gzip *.txt

ls -l *.gz

rm *.gz

ls -l

71

tar Command:-

tar -cvf desktop.tar Desktop.
