

⑨ Topic: - How to Create and Execute RMAN Backup Scripts

```
> $ set oracle_sid = orcl .  
> $ rman target / catalog rman user / rman pwd @ dbcat
```

```
RMAN> list backup summary;  
RMAN> create script my_script {  
    backup database;  
}
```

```
RMAN> run { execute script my_script ; }
```

```
RMAN> list backup summary;
```

```
RMAN> create script weekly_full_disk  
{
```

```
allocate channel c1 device type disk format '/u01/rman/backup/  
    /orcl-df-%D-%T';  
    .. .. c2 .. ..  
    .. .. c3 .. ..
```

```
backup incremental level 0 database;  
backup archive log all format '/u01/rman/backup/archive/  
    arc_%d-%u-%s_%T'  
    not backed up 2 times;
```

```
delete noprompt archive log until time 'sysdate-6'  
    backed up 1 times to device type disk;
```

```
release channel c1;
```

```
.. .. c2;
```

```
.. .. c3;
```

RMAN> run { execute SCRIPT weekly-full-disk; }

RMAN> list SCRIPT names;

RMAN> print SCRIPT my-script;

22

RMAN> print SCRIPT weekly-full-disk;
