

Topic: - How to Kill an RMAN Session:-

\$ Set ORACLE_SID = ORCL.

\$ rman target /

↓ (means connect at sysdba)

RMAN> backup database plus archivelog
(inc)

op

<SID = 115>
not 1155

SQL> select serial# from v\$session where sid = 115;

RMAN> (Exam: your session killed) → SID serial No

SQL> alter system kill session '115,73';

SQL> select program from v\$session;

(ie program that are connect to oracle database)

SQL> desc dba_recyclebin;

SQL> purge dba_recyclebin;

↓ to empty recyclebin
