Topic:- How to use RMAN, backup Command to perform full and Incremental backups of database.

25

> \$ set ORACLE_SID = ORCL

> \$ sqlplus / as sysdba

SQL> startup

SQL> select name from v\$database;

SQL> select name from v\$tablespace;

SQL> exit

> \$ rman target /

RMAN> show all;

RMAN> list backup summary;

RMAN> backup database;

RMAN> list backup summary;

RMAN> list backup;

RMAN> backup database plus archivelog;

RMAN> backup incremental level 0 database;

or
↓
backup database (no difference)

only diff is in recovery time.

RMAN> backup incremental level 1 database;

(only the changes since the last 0 (full backup will be taken).

RMAN> backup incremental level=1 cumulative

tablespace users;

(to take tablespace level incremental backup).

RMAN> backup archiveof all;

26

RMAN> List backup Summary;

RMAN> List backup;
